

CLINICAL PAYMENT AND CODING POLICY

If a conflict arises between a Clinical Payment and Coding Policy (CPCP) and any plan document under which a member is entitled to Covered Services, the plan document will govern. If a conflict arises between a CPCP and any provider contract pursuant to which a provider participates in and/or provides Covered Services to eligible member(s) and/or plans, the provider contract will govern. "Plan documents" include, but are not limited to, Certificates of Health Care Benefits, benefit booklets, Summary Plan Descriptions and other coverage documents. BCBSTX may use reasonable discretion interpreting and applying this policy to services being delivered in a particular case. BCBSTX has full and final discretionary authority for their interpretation and application to the extent provided under any applicable plan documents.

Providers are responsible for submission of accurate documentation of services performed. Providers are expected to submit claims for services rendered using valid code combinations from Health Insurance Portability and Accountability Act (HIPAA) approved code sets. Claims should be coded appropriately according to industry standard coding guidelines including, but not limited to: Uniform Billing (UB) Editor, American Medical Association (AMA), Current Procedural Terminology (CPT[®]), CPT[®] Assistant, Healthcare Common Procedure Coding System (HCPCS), ICD-10 CM and PCS, National Drug Codes (NDC), Diagnosis Related Group (DRG) guidelines, Centers for Medicare and Medicaid Services (CMS) National Correct Coding Initiative (NCCI) Policy Manual, CCI table edits and other CMS guidelines.

Claims are subject to the code edit protocols for services/procedures billed. Claim submissions are subject to claim review including but not limited to, any terms of benefit coverage, provider contract language, medical policies, clinical payment and coding policies as well as coding software logic. Upon request, the provider is urged to submit any additional documentation.

Preventive Services Policy

Policy Number: CPCP006

Version 1.0

Enterprise Clinical Payment and Coding Policy Committee Approval Date: September 25, 2020

Effective Date: 10/01/2020

Definitions

The following acronyms have been utilized throughout this reimbursement policy

ACIP:	Advisory Committee on Immunization Practices
CDC:	Centers for Disease Control and Prevention
FDA:	United States Food and Drug Administration
HRSA:	Health Resources and Services Administration
PPACA:	Patient Protection and Affordable Care Act of 2010
USPSTF:	United States Preventive Services Task Force

Description

Section 2713 of the Patient Protection and Affordable Care Act (PPACA) mandates that private health plans provide coverage of preventive services issued by the following agencies: The United States Preventive Services Task Force (USPSTF), the Advisory Committee on Immunization Practices (ACIP) of the Centers for Disease Control and Prevention (CDC), and the Health Resources and Service Administration (HRSA) with respect to women's guidelines and guidelines for infants, children and adolescents. These services are available at no cost-share when obtained by a member covered under a non-grandfathered plan. This applies to members belonging to individual, small group, large group and self-insured plans. There is no copay, deductible or coinsurance, even if the individual or family deductible or out-of-pocket maximum has not been met as long as the member utilizes a provider in the plan's network.

Preventive care or preventive medicine refers to measures or services taken to promote health and early detection/prevention of disease(s) and injuries rather than treating them and/or curing them. Preventive care may include, but are not limited to, examinations and screening tests tailored to an individual's age, health and family history.

PPACA does not mandate that preventive services be covered at no member cost-share when obtained out-of-network. Members that obtain preventive services out of their network will be subject to copay, deductible, and coinsurance.

Grandfathered plans are plans that have been in existence prior to March 23, 2010, and are exempt from the requirement of providing preventive services at no member cost share. Grandfathered plans have the opportunity to elect providing coverage of preventive services at no member cost share but are not required to do so.

The USPSTF applies a letter grade for each of the recommendations that are released. The grade definitions for USPSTF recommendations released after July 2012 are as follows https://www.uspreventiveservicestaskforce.org/Page/Name/grade-definitions

Following the recommendation of the USPTF coverage of Grade "A" and "B" recommendations is provided at no member cost share for members with a non-grandfathered health plan. The USPTF published recommendations can be found at https://www.uspreventiveservicestaskforce.org/BrowseRec/Index

Grade	Definition
Α	The USPSTF recommends the service. There is high
~	certainty that the net benefit is substantial.
В	The USPSTF recommends the service. There is high
	certainty that the net benefit is moderate or there is
	moderate certainty that the net benefit is moderate to
	substantial.
С	The USPSTF recommends selectively offering or providing
C	this service to individual patients based on professional
	judgment and patient preferences. There is at least
	moderate certainty that the net benefit is small.
D	The USPSTF recommends against the service. There is
	moderate or high certainty that the service has no net
	benefit or that the harms outweigh the benefits.
1	The USPSTF concludes that the current evidence is
•	insufficient to assess the balance of benefits and harms
	of the service. Evidence is lacking, of poor quality or
	conflicting, and the balance of benefits and harms cannot
	be determined.

The ACIP publishes recommendations on the safe utilization of vaccines. ACIP's recommendations include immunization schedules for children and adolescents as well as adults which can be found at https://www.cdc.gov/vaccines/schedules/hcp/index.html . Travel Immunizations such as, but not limited to, Japanese Encephalitis, Typhoid, Yellow Fever, and Small Pox are excluded from Preventive Service coverage. Other excluded vaccinations include Anthrax, Bacille Calmette Guerin for Tuberculosis (BCG), and Rabies which are not required by PPACA. Immunizations should be administered in accordance with the ACIP Recommended Child and Adult Immunization Schedules or in accordance with state law or regulations.

HRSA releases Women's Preventive Services guidelines that are aimed at improving women's health by recommending certain preventive services that should be obtained in the clinical setting. HRSA's list of recommendations can be obtained at https://www.hrsa.gov/womensguidelines2016/index.html

HRSA endorses preventive guidelines established by the American Academy of Pediatrics for the health and well-being of infants, children and adolescents. These recommendations are referred to as Bright Futures and the comprehensive list of Bright Future's recommendations can be found at https://www.aap.org/en-us/Documents/practicet_periodicity_AllVisits.pdf

Reimbursement Information:

Certain preventive care services may be considered eligible for coverage under the member's benefit plan as required by PPACA and/or an applicable state mandate. In general, these services include, but are not limited to, screenings, immunizations, and other types of care as recommended by the United States Federal Government.

These services are not subject to application of cost-sharing such as copayments, co-insurance or deductibles when they are considered eligible for coverage and are provided by a network provider. In order for preventive claims to process at the preventive level with no member cost share, the claim must include a preventive diagnosis code, a preventive procedure code, meet medical policy review criteria, and fall within the guidelines issued by the USPSTF, ACIP, HRSA or Bright Futures.

Health care providers (facilities, physicians and other health care professionals) are expected to exercise independent medical judgement in providing care to patients. This Preventive Services Reimbursement policy is not intended to impact care decisions or medical practice.

The following grid provides a list of the recommendations released by the USPSTF, ACIP, HRSA, or Bright Futures along with the corresponding procedure codes and diagnosis codes deemed to be preventive.

USPSTF Recommendations:

Service:	Procedure Code(s):	Additional Reimbursement Criteria:
Abdominal Aortic Aneurysm Screening <u>USPSTF "B" Recommendation December</u> <u>2019</u> The USPSTF recommends 1-time screening for abdominal aortic aneurysm (AAA) with ultrasonography in men aged 65 to 75 years who have ever smoked.	76706	Procedure code 76706 is reimbursable as preventive when submitted with one of the following: Z13.6, Z87.891, Z72.0, Z00.00, Z00.01, F17.210, F17.200
Abnormal Blood Glucose and Type 2 Diabetes Mellitus Screening USPSTF "B" Recommendation October 2015 The USPSTF recommends screening for abnormal blood glucose as part of cardiovascular risk assessment in adults aged 40 to 70 years who are overweight or obese. Clinicians should offer or refer patients with abnormal blood glucose to intensive behavioral counseling interventions to promote a healthful diet and physical activity.	82947, 82948, 82950, 82951, 83036, 82952	Payable with a diagnosis code in Diagnosis List 1
Unhealthy Alcohol Use in Adolescents and Adults: Screening and Behavioral Counseling Interventions USPSTF "B" Recommendation November 2018	99385, 99386, 99387, 99395, 99396, 99397, 99408, 99409, G0396, G0397, G0442, G0443	Payable with a diagnosis code in Diagnosis List 1

Service:	Procedure Code(s):	Additional Reimbursement Criteria:
The USPSTF recommends screening for unhealthy alcohol use in primary care settings for adults 18 years or older, including pregnant women, and providing persons engaged in risky or hazardous drinking with brief behavioral counseling interventions to reduce unhealthy alcohol use.		
Aspirin Use to Prevent Cardiovascular Disease and Colorectal Cancer Preventive Medication <u>USPSTF "B" Recommendation April 2016</u> The USPSTF recommends initiating low-dose aspirin use for the primary prevention of cardiovascular disease (CVD) and colorectal cancer (CRC) in adults aged 50 to 59 years who have a 10% or greater 10-year CVD risk, are not at increased risk for bleeding, have a life expectancy of at least 10 years, and are willing to take low-dose aspirin daily for at least 10 years.		For details about pharmacy benefit coverage, contact the number on the patient's BCBSTX member card. A patient's pharmacy benefit may be managed by a company other than BCBSTX. Prescription required Coverage includes 81 mg dosage for generics
Asymptomatic Bacteriuria in Adults Screening USPSTF "B" Recommendation September 2019 The USPSTF recommends screening for asymptomatic bacteriuria using urine culture in pregnant persons.	81007, 87086, 87088	Payable with a Pregnancy Diagnosis
BRCA-Related Cancer Risk Assessment, Genetic Testing <u>USPSTF "B" Recommendation August 2019</u> USPSTF recommends that primary care clinicians assess women with a personal or family history of breast, ovarian, tubal, or peritoneal cancer or who have an ancestry associated with breast cancer susceptibility 1 and 2 (BRCA1/2) gene mutations with an appropriate brief familial risk assessment tool. Women with a positive result on the risk assessment tool should receive genetic counseling and, if indicated after counseling, genetic testing.	81212, 81215, 81216, 81217, 81162, 81163, 81164, 81165, 81166, 81167, 96040, 99385, 99386, 99387, 99395, 99396, 99397, 99401, 99402, 99403, 99404, G0463, S0265, 81307, 81308	These services are subject to Medical Policy and prior authorization may be required Procedure codes 81212, 81215- 81217, 81162-81167, 81307 and 81308 are reimbursable as preventive when submitted with one of the following primary diagnosis codes: Z80.3, Z80.41, Z85.3, Z85.43 Procedure code 96040 is reimbursable as preventive when submitted with one of the

Service:	Procedure Code(s):	Additional Reimbursement Criteria:
		following primary diagnosis codes: Z80.3 or Z80.41
		All other procedure codes for BRCA are payable with a diagnosis in Diagnosis List 1
Breast Cancer Medications for Risk Reduction USPSTF "B" Recommendations September		For details about pharmacy benefit coverage, contact the number on the patient's BCBSTX member card. A

Falls Prevention in Community Dwelling Older Adults: Interventions	97110, 97112, 97116, 97150, 97161, 97162, 97163, 97164, 97165, 97166, 97167, 97168	Prescription required Procedure codes 97110, 97112,
<u>USPSTF "B" Recommendation April 2018</u> The USPSTF recommends exercise interventions to prevent falls in community-dwelling adults aged 65 years or older who are at increased risk for falls.	97166, 97167, 97168, 97530	97116, 97150, 97161, 97162, 97163, 97164, 97165, 97166, 97167, 97168 and 97530 reimbursable with a diagnosis of Z91.81
Folic Acid for the Prevention of Neural Tube Defects: Preventive Medication		Prescription required
USPSTF "A" Recommendation January 2017 The USPSTF recommends that all women who are planning or capable of pregnancy take a daily supplement containing 0.4 to 0.8 mg (400 to 800 μg) of folic acid.		Over-the-counter (OTC) only
Gestational Diabetes Mellitus Screening <u>USPSTF "B" Recommendation January 2014</u> The USPSTF recommends screening for gestational diabetes mellitus (GDM) in asymptomatic pregnant women after 24 weeks of gestation.	36415, 82947, 82948, 82950, 82951, 82952, 83036	Payable with a pregnancy diagnosis
Refer also to HRSA's 'Gestational Diabetes' recommendation		
Gonorrhea Screening USPSTF "B" Recommendation September 2014 The USPSTF recommends screening for gonorrhea in sexually active women age 24 years and younger and in older women who are at increased risk for infection.	87801, 87590, 87591, 87592, 87850	Payable with a diagnosis code in Diagnosis List 1
Healthful Diet and Physical Activity for Cardiovascular Disease Prevention in Adults	99385, 99386, 99387, 99395, 99396, 99397,	

Service:	Procedure Code(s):	Additional Reimbursement Criteria:
with Cardiovascular Risk Factors: Behavioral Counseling USPSTF "B" Recommendation August 2014 The USPSTF recommends offering or referring adults who are overweight or obese and have additional cardiovascular disease (CVD) risk factors to intensive behavioral counseling interventions to promote a healthful diet and physical activity for CVD prevention.	G0438, G0439, G0446, S9452, S9470, 97802, 97803, 97804, G0270, G0271, 99078, 99401, 99402, 99403, 99404, 99411, 99412, G0473	
Hepatitis B in Pregnant Women Screening <u>USPSTF "A" Recommendation July 2019</u> The USPSTF recommends screening for hepatitis B virus (HBV) infection in pregnant women at their first prenatal visit.	80055, 86706, 87340, 87341, 80074, 80076, G0499, 36415	Payable with a pregnancy diagnosis, or diagnosis in Diagnosis List 1
Hepatitis B Virus Infection Screening <u>USPSTF "B" Recommendation May 2014</u> The USPSTF recommends screening for hepatitis B virus (HBV) infection in persons at high risk for infection.	80055, 86706, 87340, 87341, 80074, 80076	Payable with a diagnosis code in Diagnosis List 1
Hepatitis C Screening <u>USPSTF "B" Recommendation March 2020</u> The USPSTF recommends screening for hepatitis C virus infection in adults aged 18 to 79 years.	86803, 86804, G0472	Payable with a diagnosis code in Diagnosis List 1
High Blood Pressure in Adults Screening <u>USPSTF "A" Recommendation October 2015</u> The USPSTF recommends screening for high blood pressure in adults aged 18 years or older. The USPSTF recommends obtaining measurements outside of the clinical setting for diagnostic confirmation before starting treatment.	93784, 93786, 93788, 93790, 99385, 99386, 99387, 99395, 99396, 99397, 99473, 99474	Procedure codes 93784, 93786, 93788, 93790, 99473 and 99474 are reimbursable at the preventive level when billed with one of the following diagnosis codes: R03.0, R03.1, Z01.30, Z01.31
Human Immunodeficiency Virus (HIV) Infection Prevention Drug (PrEP)		Covers 200mg or 300 mg tablets of Truvada.

Service:	Procedure Code(s):	Additional Reimbursement Criteria:
USPSTF "A" Recommendation June 2019 The USPSTF recommends that clinicians offer preexposure prophylaxis (PrEP) with effective antiretroviral therapy to persons who are at high risk of HIV acquisition. See the Clinical Considerations section for information about identification of persons at high risk and selection of effective antiretroviral therapy.		Prescription required. For details about pharmacy benefit coverage, contact the number on the patient's BCBSTX member card. A patient's pharmacy benefit may be managed by a company other than BCBSTX.
Human Immunodeficiency Virus (HIV) Infection Screening for Non-Pregnant Adolescents and AdultsUSPSTF "A" Recommendation June 2019 The USPSTF recommends that clinicians screen for HIV infection in adolescents and adults aged 15 to 65 years. Younger adolescents and older adults who are at increased risk should also be screened.Refer also to HRSA's 'HIV Screening and Counseling' recommendationRefer also to Bright Future's 'STI/HIV Screening' recommendation	87806, 87389, 87390, 87391, G0432, G0433, G0435	Payable with a diagnosis code in Diagnosis List 1
Human Immunodeficiency Virus (HIV) Infection Screening for Pregnant Women USPSTF "A" Recommendation June 2019 The USPSTF recommends that clinicians screen all pregnant persons, including those who present in labor or at delivery whose HIV status is unknown. Refer also to HRSA's 'HIV Screening and Counseling' recommendation Refer also to Bright Future's 'STI/HIV Screening' recommendation	36415, 80081, 86689, 86701, 86702, 86703, 87389, 87390, 87391, 87806, G0432, G0433, G0435, G0475	Payable with a pregnancy diagnosis or diagnosis from Diagnosis List 1
Intimate Partner Violence, Elder Abuse and Abuse of Vulnerable Adults Screening <u>USPSTF "B" Recommendation October 2018</u> The U.S. Preventive Services Task Force (USPSTF) recommends that clinicians screen	99201, 99202, 99203, 99204, 99205, 99211, 99212, 99213, 99214, 99215, 99384, 99385, 99386,99387, 99394,	Payable with a diagnosis code in Diagnosis List 1

Service:	Procedure Code(s):	Additional Reimbursement Criteria:
for intimate partner violence in women of reproductive age and provide or refer women who screen positive to ongoing support services.	99395, 99396, 99397, 99401, 99402, 99403, 99404, 99411, 99412, \$0610, \$0612, \$0613	
Latent Tuberculosis Infection Screening <u>USPSTF "B" Recommendation September</u> <u>2016</u> The USPSTF recommends screening for latent tuberculosis infection (LTBI) in populations at increased risk.	86480, 86481, 86580	Payable with a diagnosis code in Diagnosis List 1
Low-Dose Aspirin Use for the Prevention of Morbidity and Mortality from Preeclampsia: Preventive Medication USPSTF "B" Recommendation September 2014 The USPSTF recommends the use of low-dose aspirin (81 mg/d) as preventive medication after 12 weeks of gestation in women who are at high risk for preeclampsia.		Prescription required Coverage includes 81 mg dosage for generics For details about pharmacy benefit coverage, contact the number on the patient's BCBSTX member card. A patient's pharmacy benefit may be managed by a company other than BCBSTX.
Lung Cancer Screening <u>USPSTF "B" Recommendation December</u> <u>2013</u> The USPSTF recommends annual screening for lung cancer with low-dose computed tomography (LDCT) in adults aged 55 to 80 years who have a 30 pack-year smoking history and currently smoke or have quit within the past 15 years. Screening should be discontinued once a person has not smoked for 15 years or develops a health problem that substantially limits life expectancy or the ability or willingness to have curative lung surgery.	G0296, G0297	Subject to medical policy criteria and may require preauthorization Procedure code G0297 is reimbursable at the preventive level if it meets medical policy criteria and is billed with one of the following diagnosis codes: F17.200, F17.201, F17.210, F17.211, F17.220, F17.221, F17.290, F17.291, Z12.2, Z87.891
Weight Loss to Prevent Obesity-Related Morbidity and Mortality in Adults: Behavioral Interventions	97802, 97803, 97804, 99385, 99386, 99387, 99395, 99396, 99397, 99401, 99402, 99403,	

Service:	Procedure Code(s):	Additional Reimbursement Criteria:
USPSTF "B" Recommendation September 2018 The USPSTF recommends that clinicians offer or refer adults with a body mass index (BMI) of 30 or higher (calculated as weight in kilograms divided by height in meters squared) to intensive, multicomponent behavioral interventions.	99404, 99411, 99412, 99078, G0447, G0473	
Obesity in Children and Adolescents Screening USPSTF "B" Recommendation June 2017 The USPSTF recommends that clinicians screen for obesity in children and adolescents 6 years and older and offer them or refer them to comprehensive, intensive behavioral interventions to promote improvement in weight status.	97802, 97803, 99383, 99384, 99385, 99393, 99401, 99402, 99403, 99404, 99411, 99412, G0446, G0447, G0473	
Ocular Prophylaxis for Gonococcal Ophthalmia Neonatorum Preventive Medication USPSTF "A" Recommendation January 2019 The USPSTF recommends prophylactic ocular topical medication for all newborns to prevent gonococcal ophthalmia neonatorum.		When billed under inpatient medical
Osteoporosis Screening USPSTF "B" Recommendation June 2018 The USPSTF recommends screening for osteoporosis with bone measurement testing to prevent osteoporotic fractures in women 65 years and older. The USPSTF recommends screening for osteoporosis with bone measurement testing to prevent osteoporotic fractures in postmenopausal women younger than 65 years who are at increased risk of osteoporosis, as determined by a formal clinical risk assessment tool.	76977, 77078, 77080, 77081, 78350, 78351, G0130,	Payable with a diagnosis code in Diagnosis List 1
Perinatal Depression: Preventive Interventions	99385,99386, 99387, 99395, 99396, 99397, 99401, 99402, 99403,	Payable with a diagnosis on Diagnosis List 1

Service:	Procedure Code(s):	Additional Reimbursement Criteria:
<u>USPSTF "B" Recommendation February 2019</u> The USPSTF recommends that clinicians provide or refer pregnant and postpartum persons who are at increased risk of perinatal depression to counseling interventions	99404, 96160, 96161, G0444	
Phenylketonuria in Newborns Screening <u>USPSTF "A" Recommendation March 2008</u> The USPSTF recommends screening for phenylketonuria in newborns.	84030, 99381, S3620	Procedure codes 84030 and S3620 reimbursable at the preventive level for children 0-90 days old
Preeclampsia Screening <u>USPSTF "B" Recommendation April 2017</u> The USPSTF recommends screening for preeclampsia in pregnant women with blood pressure measurements throughout pregnancy.		Preeclampsia screening is done through routine blood pressure measurements
Rh(D) Incompatibility Screening <u>USPSTF "A" Recommendation February 2004</u> The USPSTF strongly recommends Rh(D) blood typing and antibody testing for all pregnant women during their first visit for pregnancy-related care. <u>USPSTF "B" Recommendation February 2004</u> The USPSTF recommends repeated Rh(D) antibody testing for all unsensitized Rh(D)- negative women at 24 to 28 weeks' gestation, unless the biological father is known to be Rh(D)-negative.	80055, 86850, 86870, 86900, 86901, 36415	Payable with a pregnancy diagnosis
Sexually Transmitted Infections Behavioral Counseling <u>USPSTF "B" Recommendation August 2020</u> The USPSTF recommends behavioral counseling for all sexually active adolescents and for adults who are at increased risk for sexually transmitted infections (STIs).	99384, 99385, 99386, 99387, 99394, 99395, 99396, 99397, 99401, 99402, 99403, 99404, 99411, 99412, G0445	

Service:	Procedure Code(s):	Additional Reimbursement Criteria:
Refer also to HRSA's 'Sexually Transmitted Infections Counseling' recommendation		
Sickle Cell Disease (Hemoglobinopathies) in Newborns Screening USPSTF "A" Recommendation September 2007 The USPSTF recommends screening for sickle cell disease in newborns.	83020, 83021, 83030, 83033, 83051, 85004, 85013, 85014, 85018, 85025, 85027, 99381, G0306, G0307, S3620, S3850	
Skin Cancer Counseling <u>USPSTF "B" Recommendation March 2018</u> The USPSTF recommends counseling young adults, adolescents, children, and parents of young children about minimizing exposure to ultraviolet (UV) radiation for persons aged 6 months to 24 years with fair skin types to reduce their risk of skin cancer.	There are no procedure codes specific to skin cancer counseling.	
Statin Use for the Primary Prevention of Cardiovascular Disease in Adults Preventive MedicationUSPSTF "B" Recommendation November 2016The USPSTF recommends that adults without a history of cardiovascular disease (CVD) (i.e., symptomatic coronary artery disease or ischemic stroke) use a low- to moderate-dose statin for the prevention of CVD events and mortality when all of the following criteria are met: 1) they are aged 40 to 75 years; 2) they have 1 or more CVD risk factors (i.e., dyslipidemia, diabetes, hypertension or smoking); and 3) they have a calculated 10- year risk of a cardiovascular event of 10% or greater.Identification of dyslipidemia and calculation of 10-year CVD event risk requires universal lipids screening in adults aged 40 to 75 years.	80061, 82465, 83700, 83718, 83719, 83721, 84478	Prescription required Ages 40-75 only Lovastatin 20mg, 40mg Pravastatin 10mg, 20mg, 40mg, 80mg For details about pharmacy benefit coverage, contact the number on the patient's BCBSTX member card. A patient's pharmacy benefit may be managed by a company other than BCBSTX.

HRSA Recommendation December 2019	G0279	
The Women's Preventive Services Initiative		
recommends that average-risk women initiate		
mammography screening no earlier than age		
40 and no later than age 50. Screening		
mammography should occur at least biennially		

Service:	Procedure Code(s):	Additional Reimbursement Criteria:
and as frequently as annually. Screening should continue through at least age 74 and age alone should not be the basis to discontinue screening. These screening recommendations are for women at average risk of breast cancer. Women at increased risk should also undergo periodic mammography screening, however, recommendations for additional services are beyond the scope of this recommendation		
Refer also to USPSTF's 'Breast Cancer Screening' recommendation		
Breastfeeding Services and Supplies <u>HRSA Recommendation December 2019</u> The Women's Preventive Services Initiative recommends comprehensive lactation support services (including counseling, education, and breastfeeding equipment and supplies) during the antenatal, perinatal, and the postpartum period to ensure the successful initiation and maintenance of breastfeeding. <i>Refer also to USPSTF's 'Breastfeeding Primary</i> <i>Care Interventions' recommendation</i>	E0602, E0603, E0604, A4281, A4282, A4283, A4284, A4285, A4286, S9443, 99401, 99402, 99403, 99404, 99411, 99412, 99347, 99348, 99349, 99350	Electric breast pumps limited to one per benefit period. Hospital Grade breast pumps are limited to rental only. Additional reimbursement information available within the "Breastfeeding Equipment and Supplies" Coverage
Cervical Cancer Screening <u>HRSA Recommendation December 2019</u> The Women's Preventive Services Initiative recommends cervical cancer screening for average-risk women aged 21 to 65 years. For women aged 21 to 29 years, the Women's Preventive Services Initiative recommends cervical cancer screening using cervical cytology (Pap test) every 3 years. Cotesting with cytology and human papillomavirus testing is not recommended for women younger than 30 years. Women aged 30 to 65 years should be screened with cytology and human papillomavirus testing every 5 years or cytology alone every 3 years. Women who are at average risk should not be screened more than once every 3 years. <i>Refer also to USPSTF 'Cervical Cancer</i>	99385, 99386, 99387, 99395, 99396, 99397, G0101, 88141, 88142, 88143, 88147, 88148, 88150, 88152, 88153, 88155, 88164, 88165, 88166, 88167, 88174, 88175, G0123, G0124, G0141, G0143, G0144, G0145, G0147, G0148, P3000, P3001, Q0091, 87623, 87624, S0610, S0612	Payable with a diagnosis code in Diagnosis List 1

Diabetes Mellitus Screening after Pregnancy	82947, 82948, 82950, 82951,	Payable with a diagnosis code in Diagnosis List 1
HRSA Recommendation	83036	
December 2019		
The Women's Preventive Services Initiative		
recommends women with a history of		
gestational diabetes mellitus (GDM) who are		
not currently pregnant and who have not		
been previously diagnosed with type 2		
diabetes mellitus should be screened for		
diabetes mellitus. Initial testing should ideally		
occur within the first year postpartum and can		
be conducted as early as 4–6 weeks		
postpartum. Women with a negative initial		
postpartum screening test result should be		
rescreened at least every 3 years for a		
minimum of 10 years after pregnancy. For		
women with a positive postpartum screening		
test result, testing to confirm the diagnosis of		
diabetes is indicated regardless of the initial		
test (e.g., oral glucose tolerance test, fasting		
plasma glucose or hemoglobin A1c). Repeat		
testing is indicated in women who were		
screened with hemoglobin A1c in the first 6 months postpartum regardless of the result.		
months postpartum regardless of the result.		
Gestational Diabetes	82947, 82948,	Payable with a pregnancy
	82950, 82951,	diagnosis
HRSA Recommendation December 2019	83036	
The Women's Preventive Services Initiative		
recommends screening pregnant women for		
gestational diabetes mellitus after 24 weeks of		
gestation (preferably between 24 and 28		
weeks of gestation) in order to prevent		
adverse birth outcomes. Screening with a 50 g oral glucose challenge test (followed by a 3-		
hour 100 g oral glucose tolerance test if		
results on the initial oral glucose challenge		
test are abnormal) is preferred because of its		
high sensitivity and specificity. The Women's		
Preventive Services Initiative suggests that		
women with risk factors for diabetes mellitus		
be screened for preexisting diabetes before 24		

Service:	Procedure Code(s):	Additional Reimbursement Criteria:
weeks of gestation—ideally at the first prenatal visit, based on current clinical best practices.		
Refer also to USPSTF's 'Gestational Diabetes Mellitus Screening' recommendation		
Human Immune-Deficiency Virus Counseling & Screening HRSA Recommendation December 2019 The Women's Preventive Services Initiative recommends prevention education and risk assessment for human immunodeficiency virus (HIV) infection in adolescents and women at least annually throughout the life span. All women should be tested for HIV at least once during their lifetime. Additional screening should be based on risk, and screening annually or more often may be appropriate for adolescents and women with an increased risk of HIV infection. Screening for HIV is recommended for all pregnant women upon initiation of prenatal care with retesting during pregnancy based on risk factors. Rapid HIV testing is recommended for pregnant women who present in active labor with an undocumented HIV status. Screening during pregnancy enables prevention of vertical transmission. <i>Refer also to USPSTF's 'Human Immunodeficiency Virus (HIV) Infection Screening for Pregnant and Non-Pregnant Adolescents and Adults' recommendation Refer also to Bright Future's 'STI/HIV' Screening' recommendations</i>	36415, 86689, 86701, 86702, 86703, 87389, 87390, 87391, 87806, G0432, G0433, G0435, G0475	Payable when billed with a diagnosis in Diagnosis List 1
Human Papillomavirus Testing (HPV) <u>HRSA Recommendation August 2012</u> HRSA recommends high-risk human papillomavirus DNA testing in women with normal cytology results. Screening should begin at 30 years of age and should occur no more frequently than every 3 years	87623, 87624, 87625, G0476, 0500T, 0096U	Payable with a diagnosis in Diagnosis List 1

Service:	Procedure Code(s):	Additional Reimbursement Criteria:
Interpersonal and Domestic Violence Screening <u>HRSA Recommendation December 2019</u> The Women's Preventive Services Initiative recommends screening adolescents and women for interpersonal and domestic violence at least annually, and, when needed, providing or referring for initial intervention services. Interpersonal and domestic violence includes physical violence, sexual violence, stalking and psychological aggression (including coercion), reproductive coercion, neglect, and the threat of violence, abuse or both. Intervention services include, but are not limited to, counseling, education, harm reduction strategies, and referral to appropriate supportive services.	99401, 99402, 99403, 99404, 99411, 99412, 99384, 99385, 99386, 99387, 99394, 99395, 99396, 99397, 99201, 99202, 99203, 99204, 99205, 99211, 99212, 99213, 99214, 99215	
Sexually Transmitted Infections Counseling <u>HRSA Recommendation December 2019</u> The Women's Preventive Services Initiative recommends directed behavioral counseling by a health care provider or other appropriately trained individual for sexually active adolescent and adult women at an increased risk for sexually transmitted infections (STIs). The Women's Preventive Services Initiative recommends that health care providers use a woman's sexual history and risk factors to help identify those at an increased risk of STIs. Risk factors may include age younger than 25, a recent history of an STI, a new sex partner, multiple partners, a partner with concurrent partners, a partner with an STI, and a lack of or inconsistent condom use. For adolescents and women not identified as high risk, counseling to reduce the risk of STIs should be considered, as determined by clinical judgement. <i>Refer also to USPSTF's 'Sexually Transmitted</i> <i>Infections Behavioral Counseling'</i> <i>recommendation</i>	99401, 99402, 99403, 99404, 99411, 99412, 99384, 99385, 99386, 99387, 99394, 99395, 99396, 99397, G0445	
Urinary Incontinence Screening	There are no procedure codes	Payable with a diagnosis in Diagnosis List 1

Service:	Procedure Code(s):	Additional Reimbursement Criteria:
HRSA RecommendationDecember 2019The Women's Preventive Services Initiativerecommends screening women for urinaryincontinence annually. Screening shouldideally assess whether women experienceurinary incontinence and whether it impactstheir activities and quality of life. TheWomen's Preventive Services Initiativerecommends referring women for furtherevaluation and treatment if indicated. TheWomen's Preventive Services Initiativerecommends screening women for urinaryincontinence as a preventive service. Factorsassociated with an increased risk for urinaryincontinence include increasing parity,advancing age and obesity; however, thesefactors should not be used to limit screening.Several screening tools demonstrate fair tohigh accuracy in identifying urinaryincontinence in women. Although minimumscreening intervals are unknown, given theprevalence of urinary incontinence, the factthat many women do not volunteersymptoms, and the multiple, frequently-changing risk factors associated withincontinence, it is reasonable to conductannually.	specific to this service. This service would be part of the preventive office visit.	
Well-Woman Visits <u>HRSA Recommendation December 2019</u> The Women's Preventive Services Initiative recommends that women receive at least one preventive care visit per year beginning in adolescence and continuing across the life span to ensure that the recommended preventive services, including preconception, and many services necessary for prenatal and interconception care are obtained. The primary purpose of these visits should be the delivery and coordination of recommended preventive services as determined by age and risk factors.	99384, 99385, 99386, 99387, 99394, 99395, 99396, 99397, G0101, G0438, G0439, 99078, 99401, 99402, 99403, 99404, 99411, 99412, 99408, 99409, G0396, G0442, G0443, G0444	Labs administered as part of a normal pregnancy reimbursable at the preventive level when billed with a pregnancy diagnosis

Breastfeeding Equipment & Supplies

Non-grandfathered plans provide coverage of manual, electric, and hospital grade breast pumps along with breastfeeding supplies at the preventive level.

Manual breast pumps utilize procedure code E0602 and are available for purchase and covered at the preventive level when obtained In-Network, Out-of-Network or from Retail providers. Sales tax is excluded from retail purchases.

Electric breast pumps utilize procedure code E0603 and must be rented or purchased from an In-Network provider or a contracted durable medical equipment supplier. The models of breast pumps being provided at the preventive level are up to the individual provider's discretion. If a member chooses to obtain an upgraded model, they may be balance billed the difference between the allowance of the standard model and the cost of the upgraded model. Members are allowed one electric breast pump per benefit period.

*Note: Retail providers such as Target, Walmart or online vendor are not licensed medical providers and therefore are considered Out of Network. Out of network coverage will follow the out of network benefit level for preventive services. This may include cost sharing and sales tax is excluded. *

Hospital grade breast pumps utilize procedure code E0604 and are only covered when rented In-Network or from an In-Network durable medical equipment supplier. Hospital grade breast pump coverage is up to the purchase price of \$1,000.00 or 12 months, whichever comes first. At the end of coverage, the unit must be returned to the durable medical equipment supplier. Members are allowed one breast pump per benefit period.

Breast pumps obtained from Out of Network providers are reimbursable at the Out of Network level.

The following breast pump supplies are reimbursable at the preventive level. Some limitations and restrictions may apply based on the group coverage for preventive services.

- A4281- Tubing for breast pump, replacement, spare membranes, replacements
- A4282- Adapter for breast pump, replacement
- A4283- Cap for breast pump bottle, replacement
- A4284- Breast shield and splash protector for use with breast pump, replacement
- A4285- Polycarbonate bottle for use with breast pump, replacement
- A4286- Locking ring for breast pump, replacement

Differentiating Preventive Care versus Diagnostic Care

The following types of services are considered Preventive:

- Screenings intended to prevent illness or identify issues before symptoms are evident
- Counseling intervention as defined by a specific preventive recommendation

Examples of preventive services:

- A 60-year-old woman obtains her biennial mammogram to screen for breast cancer
- A patient who has been identified as having cardiovascular disease risk factors is referred for nutritional counseling
- A 50-year old patient obtains a colonoscopy to screen for colorectal cancer
- A 42-year-old patient goes to their doctor for their annual physical and receives a blood test to screen for abnormal blood glucose

The following types of services are considered Diagnostic:

- The diagnosis of existing symptoms or abnormalities
- Treatment for specific health conditions, ongoing care, or other tests to manage a health condition

Examples of diagnostic services:

- A 60-year-old woman obtains a mammogram after noticing a lump in her breast
- A patient diagnosed with diabetes is referred for nutritional counseling to manage their condition
- A patient goes to their doctor for their annual physical and receives a blood test to check iron and liver function, and a urinalysis is requested

Limitations and Exclusions

- 1. <u>Services not reimbursable at the preventive level may be reimbursable under another portion of the medical plan.</u>
- 2. Breastfeeding equipment and supplies not listed underneath the "Breastfeeding Equipment and Supplies" section. This includes, but is not limited to
 - a. Batteries
 - b. Breastfeeding ointments, creams
 - c. Breast milk storage supplies including bags, freezer packs, etc.
 - d. Breast pump cleaning supplies
 - e. Breast pump traveling cases
 - f. Infant scales
 - g. Nursing bras
 - h. Nursing covers, scarfs
- 3. Immunizations that are not published in the Center for Disease Control's Morbidity and Mortality Weekly Report (MMWR) and/or are not on the list of "Vaccines Licensed for Use in the United States" by the United States Food and Drug Administration (FDA).
- 4. Prescription coverage may vary depending on the terms and conditions of the plans. A prescription may be required for coverage under the pharmacy benefit. The plan may also require that the generic drug be tried first before the brand version. Age limits, restrictions and other requirements may apply. Members can verify their pharmacy benefits by calling the customer service number on the back of their ID card.
- 5. For OTC purchases, members will need to obtain a prescription from their provider and take it to the pharmacy to be filled.
- 6. If there is a medication not included, the member should consult their doctor for therapeutic alternatives first before submitting coverage exceptions to BCBSTX.

Each benefit plan, summary plan description or contract defines which services are covered, which services are excluded, and which services are subject to dollar caps or other limitations, conditions or exclusions. Members and their providers have the responsibility for consulting the member's benefit plan, summary plan description or contract to determine if there are any exclusions or other benefit limitations applicable to this service or supply. If there is a discrepancy between a MEDICAL POLICY and a member's benefit plan, summary plan description or contract, the benefit plan, summary plan description or contract, the benefit plan, summary plan description or contract will govern.
