

BlueCross BlueShield  
of Texas

Member Preferred Drug List (Top 1,500)  
Effective January 1, 2004

For use by all Blue Cross and Blue Shield of Texas Plans, HMO Blue® Texas plans, and national Blue Cross and Blue Shield of Texas plans.

The Member Preferred Drug List is a list of the 1,500 most commonly prescribed preferred brand-name drugs. Please use this drug list as a guide. If a medication is not on the Member Preferred Drug List, it may not be a preferred drug. In addition, the drugs on this list may or may not be preferred depending upon the list that was finalized on your plan's start date and updated as of your anniversary date. This list does not contain all preferred brand-name drugs, only the top 1,500 based on utilization. Every effort has been made to show these listings accurately, but additions, deletions and changes may occur.

When an asterisk appears by the drug name, a generic equivalent is available. If you have questions and need additional information about your covered pharmacy benefits, call the Customer Service number on the back of your ID card. You may also check the drug list and prescribing guidelines section of the Blue Cross and Blue Shield of Texas Web site at [www.bcbstx.com](http://www.bcbstx.com) to locate covered prescription medications online.
