

**SIGNIFICANT EDITS**

(Claim Data 01/01/2009 – 09/01/2009)

Blue Cross and Blue Shield of Texas (BCBSTX) utilizes an automated code auditing system that is designed to review reported codes to ensure that the correct procedure codes are identified for reimbursement. Claims are audited to review for potential incorrect billing. The following codes represent those procedures that are reported in high volume and that are not separately payable when billed in conjunction with other procedures.

For additional information about specific coding scenarios or customized edits, access [Clear Claim Connection \(C3\)](#) through the BCBSTX Web site. Additional codes may be denied or reduced.

**Charge is an exact duplicate of a charge already processed on this claim.**
