Limited Provider Networks

Your primary care practitioner is part of a provider network or association of health care professionals who work together to provide a full range of health care services. That means, when you choose your primary care practitioner, you are also choosing a limited provider network and in most instances, for services to be covered by your health care benefit plan, you are not allowed to receive services from any practitioner or health care professional that is not also part of your primary care practitioner’s network. You will not be able to select any practitioner or provider outside of your primary care practitioner’s network, even if that practitioner or provider is participating in Blue Premier.SM All of your care will be provided by or arranged for within the limited provider network to which your primary care practitioner belongs, so make sure that your primary care practitioner’s network includes the specialists and hospitals that you prefer.

ATTENTION FEMALE ENROLLEES: Choosing OB/GYN Services

In selecting your primary care practitioner, remember that your primary care practitioner’s network affects your choice of an OB/GYN. For preventive care (well-woman exams), gynecological conditions, or maternity care, female members may see a network OB/GYN without first obtaining a referral from their primary care practitioner. If you choose to select an OB/GYN, the OB/GYN you select must belong to the same limited provider network as your primary care practitioner. This is another reason to make certain that your primary care practitioner’s network includes the specialists, particularly the OB/GYN, and hospitals that you prefer. You are not required to select an OB/GYN; you may elect to receive your OB/ GYN services from your primary care practitioner.
