Blue Essentials, Blue Advantage HMO, Blue Premier and MyBlue Health Provider Manual - Hospital Acquired Conditions and Serious Reportable Events

Overview

The section covers the **Hospital Acquired Conditions and Serious Reportable Events** policy and what Blue Cross and Blue Shield of Texas (BCBSTX) reviews for these events.

Policy

The **Plans** will apply the following principles and guidelines for review and determination of **Hospital Acquired Conditions** (identified by CMS) and **Serious Reportable Events** (identified by National Quality Form), to determine whether reimbursement to a physician or professional provider should be reduced for the additional costs related to the event.

- The error or event must be preventable.
- The error or event must be within control of the physician or professional provider.
- The error or event must be a result of a mistake by the physician or professional provider.
- The error or event must result in significant harm.
- Identification of non-payable events will incorporate case-by-case review and determination by a BCBSTX Medical Director, except when self-reported and without dispute.

If medical records are required to complete a review of a Hospital Acquired Condition/Serious Reportable Event, the minimum defined record set will include: Discharge Summary, Admission History and Physical, Operative Reports, Consultation Reports, Physician Progress Notes, Emergency Department records (if admitted via the ER), and other documentation as determined by the Medical Director.

If adjustment of claims is determined applicable, the physician or professional provider will be notified. The physician or professional provider may appeal a decision made by BCBSTX for the Hospital Acquired Condition/Serious Reportable Event and appeal instructions will be included in the notification letter.

Blue Essentials, Blue Advantage HMO, Blue Premier and MyBlue Health Provider Manual - Hospital Acquired Conditions and Serious Reportable Events

Hospital Acquired Conditions

As defined by CMS, Hospital Acquired Conditions are those conditions that are acquired by a patient while they are in the inpatient hospital setting and were not present upon admission to the hospital.

The following Hospital Acquired Condition represents a potential area of responsibility and will be reviewed by a BCBSTX Medical Director on a case by case basis:

- Foreign Object Retained After Surgery
-

Serious Reportable Events

As defined by the National Quality Forum (NQF), Serious Reportable Events are adverse events that are serious, but largely preventable, and of concern to both the public and health care providers for purposes of public accounting. Serious Reportable Events earned that name because these events should never happen in medical practice.

The following Serious Reportable Events represent potential areas of responsibility and will be reviewed by a BCBSTX Medical Director on a case by case basis:

1. Surgery performed on the wrong body part
 2. Surgery performed on the wrong patient
 3. The wrong surgical procedure performed on a patient
-
