

The Patient Cost Estimator is a tool in the Availity portal that provides real-time estimation of member responsibility. This feature can be utilized at the time of service, enabling professional providers to collect copayments, coinsurance and deductible amounts up front for Blue Cross and Blue Shield of Texas (BCBSTX) members. The following information instructs users how to access and use the Patient Cost Estimator via Availity.

**Not yet registered with Availity?** Visit [Availity](#) and complete the online registration today, at no cost.

**The Patient Cost Estimator tool is currently unavailable for Medicare Advantage or Texas Medicaid members.**

Patient Cost Estimator is not a guarantee of payment. Benefits will be determined once a claim is received and will be based upon, among other things, the member's eligibility, benefits, limitations and exclusions and the terms of the member's certificate of coverage in effect on the date services are rendered. Accumulated amounts, such as deductibles, may change as additional claims may have been processed after the estimate was provided.

## 1) Getting Started
