

Blue Cross and Blue Shield of Texas (BCBSTX) will offer, Inpatient Services in an institution of Mental Disease, Partial Hospitalization and Intensive Outpatient Program as In Lieu of Services (ILOS) for STAR Kids members. Coordination of Specialty Care Services will be available as an ILOS on 10/1/25.

What is an ILOS?

ILOSs are optional services and settings offered by BCBSTX that substitute for Medicaid state plan services or settings. ILOSs must be a medically appropriate and cost-effective substitute for the covered service or setting under the state plan.

Who is Eligible?

ILOSs are available to all STAR Kids plan members, but as a BCBSTX member, you can choose not to use these services in place of a covered inpatient service.

Which services will be offered?

Inpatient Services in an Institution of Mental Disease (IMD): Services include hospitalization at an IMD in lieu of an acute care inpatient hospital setting. Inpatient services in an IMD are to treat acute psychiatric conditions and are allowed for up to 15 calendar days per month for members aged 21-64 only.

Partial Hospitalization Services: Partial hospitalization services provide a structured day program of outpatient behavioral health services. Partial Hospitalization Programs (PHPs) may provide services for mental health, SUD, or both. These services resemble highly structured, short-term hospital inpatient programs. The treatment level is more intense than outpatient day treatment or psychosocial rehabilitation.

Intensive Outpatient (IOP) Services: Intensive outpatient services, also referred to as IOP services are used to treat behavioral health issues that do not require detoxification or 24-hour supervision. IOPs are generally less intensive than PHPs. They may be delivered for mental health, SUD, or both. Intensive outpatient services are organized non-residential services providing structured group and individual therapy, educational services, and life skills training which consists of at least 10 hours per week for four to 12 weeks, but less than 24 hours per Day.

Coordination Specialty Care (CSC) Services: CSC is designed to meet the needs of persons with an early onset of psychosis. Persons enrolled in CSC receive mental health services that are based on a comprehensive, recovery-oriented model of treatment for persons with first-episode psychosis. CSC utilizes a shared-decision making and team-based approach to develop a plan of care tailored to the individualized needs of the person. CSC services are for persons aged 15–30 who have a psychotic disorder diagnosed within the past two years and who live in the service area of a CSC provider.

How to access these services?
