

What participants need to know about PCPs during Annual Enrollment | view in [Web Browser](#)

Hello,

In many districts, Annual Enrollment starts as early as next week. That's why it's so important for your employees to understand why they need a Primary Care Provider (PCP).

We know a PCP can save them money and help them get and stay healthy. This **"6 Reasons you need a Primary Care Provider"** infographic will be essential as they choose a plan during Annual Enrollment.

Please copy, paste, and share this infographic with participants so they can make informed decisions for 2021-22.

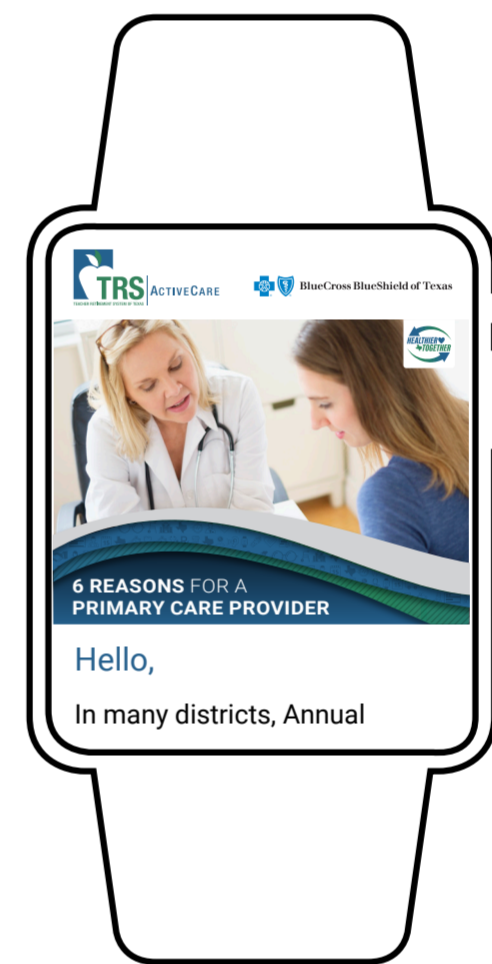

We also want to let you know you can access a wide range of tools for Annual Enrollment in the **Benefits Administrator Toolkit**. Here, you'll find everything you need, including the Admin Guide, training slides, and an employee presentation.

- 1 A PCP saves you money.**  
Every day, people go to the emergency room or an urgent care center when they could be treated by their doctor. **Getting care at an ER can cost you hundreds or even thousands of dollars** instead of paying a copay or coinsurance at your doctor's office.
- 2 A PCP can help you get healthy.**  
Preventive care is covered at 100% on every TRS-ActiveCare plan. So, **it won't cost you anything to get routine wellness exams and screenings** with your PCP. These exams and screenings can help you identify early signs of chronic conditions like high blood pressure or stress.
- 3 A PCP can help you stay healthy.**  
If you do have a chronic condition, a PCP can help you manage it with a comprehensive treatment plan. People who see a PCP tend to have better health outcomes. **You'll probably have fewer sick days, lower medical bills, and lower out-of-pocket costs, too.**
- 4 A PCP has your back.**  
**Your PCP gets to know you, your medical history, treatment preferences, personality, and lifestyle.** This knowledge doesn't just make your care more seamless, it puts someone in your corner.
- 5 A PCP can refer you when needed.**  
**When you do need to see a specialist, you don't need to worry about searching on your own.** PCPs can help guide you to a trusted health professional and help coordinate your care.
- 6 A PCP gives you peace of mind.**  
**You can make an appointment with someone you know** instead of being treated by unfamiliar providers in the ER or an urgent care center.
